The Lost Book Of Enki: Memoirs And Prophecies Of An Extraterrestrial God

Synopsis

The companion volume to The Earth Chronicles series that reveals the identity of mankind's ancient gods • Explains why these "gods" from Nibiru, the Anunnaki, genetically engineered Homo sapiens, gave Earthlings civilization, and promised to return • 30,000 sold in hardcover Zecharia Sitchin's bestselling series The Earth Chronicles provided humanity's side of the story concerning our origins at the hands of the Anunnaki, "those who from heaven to earth came." In The Lost Book of Enki we now view this saga from the perspective of Lord Enki, an Anunnaki leader revered in antiquity as a god, who tells the story of these extraterrestrials' arrival on Earth from the planet Nibiru. In his previous works Sitchin compiled the complete story of the Anunnaki's impact on human civilization from fragments scattered throughout Sumerian, Akkadian, Babylonian, Assyrian, Hittite, Egyptian, Canaanite, and Hebrew sources. Missing from these accounts, however, was the perspective of the Anunnaki themselves. What was life like on their own planet? What motives propelled them to settle on Earth--and what drove them from their new home? Convinced of the existence of a lost book that held the answers to these questions, the author began his search for evidence. Through exhaustive research of primary sources, he has here re-created tales as the memoirs of Enki, the leader of these first "astronauts." What takes shape is the story of a world of mounting tensions, deep rivalries, and sophisticated scientific knowledge that is only today being confirmed. An epic tale of gods and men unfolds, challenging every assumption we hold about our past and our future.

Book Information

Paperback: 336 pages

Publisher: Bear & Company; 2 edition (August 16, 2004)

Language: English

ISBN-10: 1591430372

ISBN-13: 978-1591430377

Product Dimensions: 6 x 0.9 x 9 inches

Shipping Weight: 1 pounds (View shipping rates and policies)

Customer Reviews

There are few true geniuses writing books we can understand and only one writing about a subject so vitally important to every human being, i.e., we cannot know where we are going if we do not know where we have come from. Now, thanks to a lifetime of dedication worthy of the greatest researchers and detectives of all time, all of Zecharia Sitchin's books and especially "The Lost Book of Enki," are available to provide plausible answers to the hundreds of questions traditional "science" and "archaeology" and biblical "scholars" cannot or refuse to answer at all, let alone satisfactorily. I think I understand why some of his fans are having trouble with "The Lost Book of Enki." They think they understand his work to the point where having it all presented in one book, and in a mytho-poetic style, no less, seems to be a rehash of what they've read. Well, they may be geniuses, themselves, because I've read all of the books twice and am one of about two dozen alumni of all of Zecharia's far flung teaching intensives, and yet I feel that I needed to read "The Lost Book of Enki" to really have a good grasp of the material and to feel it "breathe," to be mytho-poetic, myself. What a thrill to finally understand the actual basis for the seemingly ungrounded words, themes, and stories of the bible. There are also a few facts mentioned in passing that should have blown the mind of anyone who has read all the books. It should be realized that NO ONE knows Zecharia's work the way he knows it and anyone who knows him realizes what a gift this book is to the many people who have literally begged him to put it all together in one book.

So, you think Zach Sitchin is a nut, someone who lacks extensive 'Oliver Sach's' type footnotes to back up his references, and hey - anyone talking about life on other planets must be crazy...right?I went as far as to start reading the 'official' scholarly translations of the Epic of Gilgamesh, The Lament of Ur, and 'The Descent of Ishtar' and frighteningly, nearly to a few key words, Sitchin's translations of the Sumerian tablets ARE accurate!In a nutshell: over 14 or so tablet translations, the God Enki scribes his story of how Earth began. He landed searching for the Gold that Alalu first described, set up the ERIDU base and the E.DIN (like garden of), and began mining gold for Nibiru. Nibiru, our 10th planet, which crosses every 3600 yrs. The last time it crossed, Thera in Santorini blew up magnificently, and many earth changes occurred as recorded in antarctic ice cores (looks this up at the usgs.gov site). Sitchin has created a riveting story, at times quite moving, of how Enki and his fellow 50 gods, set up camp on Earth and created mankind. How exactly did the Sumerians know there were "23 branches of life" (chromosomes), with a missing 24th coding for "long life"? How did the Sumerians know, 4500 b.c., that there were '12' planets (including the sun, moon, and the 10th planet - Nibiru) when Pluto even was not discovered until 1930 by Clyde W.

Tombaugh?The biblical parallels are truly amazing considering these were written 4500 B.C.!
