good articles from reliable sources

Require textbook for my Physical Anthropology class. Although I firmly believe in evolution, I still hold my religious beliefs and try to meld the two together. In now way am I say I'm correct in this opinion of how the world came to be, but this book is a little hostile towards religious beliefs. It was a bit offensive reading the first article and having all my beliefs shot down as crazy and stupid. I realize there are numerous opinions about how the world came to be and evolution has a lot of evidence as to why it is most likely the best explanation, but I would appreciate a book that doesn't belittle the reader and their personal beliefs.
